DETAILED ACTION

Allowable Subject Matter

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 11, 13, and 22, the combination of Davis et al. and Brandenburg et al. does not disclose or suggest that the number of downsampled subband signals subjected to further subband filtering is smaller than a total number of downsampled subband signals so that downsampled subband signals that are not further subband filtered remain. In the proposed combination, Brandenburg et al. would further subband filter all of the downsampled subband signals (see Fig. 2). Thus, there is no suggestion in Davis et al. or Brandenburg et al. to only further subband filter only a portion of the downsampled subband signals.

Regarding new independent claims 26-28, these claims incorporate limitations of claims 2, 20, and 21, respectively, which were indicated as allowable subject matter in the previous Office Action. Thus, claims 26-28 are allowable for the same reasons, repeated below:

In regard to claim 26, Davis et al. and Brandenburg et al. do not disclose or suggest adding together the sub-subband signals after scaling and/or phase rotation to form a new subband signal.

In regard to claim 27, Davis et al. and Brandenburg et al. do not disclose or suggest performing, in the lowest frequency subband, phase-modifications to the sub-subband signals having a negative center center-frequency in the time domain.

In regard to claim 28, Davis et al. and Brandenburg et al. do not disclose or suggest the encoded audio signal comprises spectral band replication parameters wherein a high frequency component is derived from the spectral band replication parameters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
